PROJECTS

Eat-Split (Bill-Splitter Web App)

Built a JavaScript web application to split expenses, calculate shares, and manage shared bills — improving UI interactivity and form handling.

Rock-Paper-Scissors Game

Implemented the classic Rock-Paper-Scissors game in JavaScript, including game logic, event handling, and UI feedback for a fun interactive experience.

BD Architect Website

Created a professional website for an architecture brand using HTML and CSS,Js showcasing modern design, responsive layout, and clean visuals.

TypeScript Todo Console Application

Built a command-line based todo app in TypeScript / JavaScript, supporting task creation, deletion, and display — practiced OOP and CLI interface.

Weather App(Typescript)

Developed a console-based weather application using TypeScript, fetching data from a weather API and displaying it in a clean, readable format.

React Learning Projects (Learning)

Explored React fundamentals by building multiple small-scale apps and components, demonstrating state management, component composition, and event-driven UI.
